

Drupal 8 and Backdrop Module Matrix

Updated [over 4 years](#) ago by avatar [Jack Aponte](#)

This table is a list of Drupal 7 modules that Palante commonly uses in building client sites, accompanied by their current status in Drupal 8 and [Backdrop](#).

Module	Backdrop status	Backdrop version	D8 status	D8 version
adaptivetheme	unported	unported	pre-release	dev
addanother	ported	full	unported	none
admin_views	core	n/a	core	n/a

webform_civicrm	unported	none	planned	none
wysiwyg	core	n/a	core	n/a
wysiwyg_mediaembed	unported*	none	unported	none

Notes

- **ctools** and **entity** are mostly in core in D8.
- **messaging** and **notifications** - [D8 alternative available](#), Courier in beta for D8
- **imce_filefield** - support for file fields might now be [built into IMCE itself?](#) ~~Definitely working in Backdrop already!~~ (If it was working in Backdrop at some point, it isn't anymore!)
- **metatag** - [Backdrop alternative available](#), Base Meta Tags, full release
- **radix_layouts** - a number of Radix/Bootstrap layouts are now [included in Backdrop core](#) as of v1.4.
- **spamspan** - [Invisimail](#) is a probable Backdrop alternative.
- **views_bulk_operations** - Some, but not all, user and content bulk operations seem to be in core in both Backdrop and D8. The D8 contrib module says it fills in missing functionality.
- **webform** - There's some [preliminary code out there](#), but it looks like no one has really shown up to claim responsibility for the project. See [this issue](#) for more.
- **wysiwyg_mediaembed** - possible Backdrop alternatives include [YouTube Field](#), [Video Filter](#) and [Video Embed Field](#)
